SAFETY PLANNING WORKSHOP

For mental health clinicians - primary care providers - substance abuse counselors - hotline responders - crisis intervention services - peer supports

The Safety Planning Intervention is a brief clinical intervention that may be used with people who have made a suicide attempt or engaged in other types of suicidal behavior, reported suicidal ideation, have psychiatric disorders that increase suicide risk, or who are otherwise determined to be at risk for suicide.

Safety planning is an evidence-based practice and can be utilized in many different settings.

Free CEUs provided for NDBSWE, NDBON, NDBCE, and NDBACE (1.5 hours)
